LANGUE(S) D'ENSEIGNEMENT

Anglais

CONTENU

1) Goals:

Numerous methods are used by academics and practitioners for measuring and comparing funds or portfolio's manager performances. These methods are mainly based on the concept of risk-adjusted performances and they differ in how risk is measured. This course presents a review of these methods with numerous examples and practical cases.

2) Course outline:

- I. Regression-based performance measures : one factor model, time-varying parameters, multifactor models
- II. Performance measurement based on usual risk measures : Sharpe, Roy and extensions
- III. Performance measurement based on alternative risk measures : Sharpe-VaR, Omega, Kappa, Sortino, Calmar,...
- IV. Performance attribution

COMPÉTENCES À ACQUÉRIR

- Choose between different portfolios or financial assets
- Evaluate the risk of portfolios and financial assets
- Optimize the financial investment strategy
