OBJECTIFS
The « Public Management » course of the Licence of Public Administration is a general management course allowing a continuation of studies in public or private management. Its aims are multiple : continuation of the Master's degree program at the University or Business School, preparation of competitions of the Administration requiring the License level.
License 3 provides management courses in continuity with License 2 in the fundamental disciplines of management : finance-accounting, human resource, marketing-communication. In addition, new disciplines applied to the public sector are provided (strategy, management control, information system) in addition to subjects offering a more global and sectorial vision of contemporary public management.

COMPÉTENCES VISÉES
Cognitive skills
- Search and analyze information in management
- Mobilize management functions to apply them to professional practices
- Analyze management situations to propose operational recommendations
- Use his knowledge to pass administrative competitions

Operational skills
- Write a structured academic dissertation
- Express yourself in a professional situation
- Write and express themselves in several languages with a managerial and sectorial vocabulary
- Mastering the ICT of the manager
